

Photo Enhancements – House

Improve the brightness and color saturation of the image. Make the grass greener, and more consistent (no bare spots), bricks and door brighter, and so on. Save the image as “house” inside of your assignments folder.

Add adjustment layers for each of the following (should be able to see the improvements as separate layers):

- a. 20 pts. – Adjust the image darkness and brightness of the image (especially the house)
- b. 20 pts. - Remove imperfections on the grass and the siding on the house. Cover up items such as taking out the snow patches, removing debris, flaws, etc.
- c. 20 pts. - Make the grass greener
- d. 20 pts. – Make the bricks and door brighter
- e. 20 pts. – Make the bushes greener and brighter
